

Proposed Solution

FitBuddy – AI Fitness Plan Generator using Gemini Models

Solution Overview

FitBuddy provides a web interface where users submit fitness information. FastAPI processes the request, Gemini generates the AI output, and Jinja2 renders the result.

Core Features

- Personalized 7-day workout generation.
- Nutrition/recovery tip.
- Feedback-based workout-plan update.
- SQLite persistence.
- Admin view of users and plans.
- FastAPI /docs interface.

User Flow

Input → Generate → AI workout + nutrition tip → Review → Optional feedback → Updated plan.
