

Coding & Solution

FitBuddy – AI Fitness Plan Generator using Gemini Models

Core Implementation

Workout generation uses Gemini Pro for a structured 7-day plan.

Gemini Flash generates a concise nutrition/recovery tip.

Feedback sends the original plan and user feedback to Gemini Pro for revision.

FastAPI connects forms, AI functions, database functions and Jinja2 templates.

Routes

GET / – homepage.

POST /generate-workout – generates/stores outputs and renders result.

POST /submit-feedback – revises and stores the plan.

GET /view-all-users – displays stored users and plans.

Local Execution

Create/activate environment, install requirements, configure GOOGLE_API_KEY, then run: `uvicorn app.main:app --reload`.

Open `http://127.0.0.1:8000` and `/docs`.
