

Performance Testing

FitBuddy – AI Fitness Plan Generator using Gemini Models

Testing Scope

The project source describes local deployment verification through FastAPI/Uvicorn, browser access and /docs. No measured response-time, throughput or load-test figures are provided, so no numerical performance claim is made.

Test Scenarios

Test	Scenario	Expected Result
PT-01	Open home page	index.html loads
PT-02	Submit valid details	7-day plan and tip display
PT-03	Submit feedback	Plan is revised and displayed
PT-04	Open /docs	FastAPI documentation accessible
PT-05	Open admin view	Stored users/plans display
PT-06	Use responsive layout	Pages remain usable

Reporting Rule

For the final submission, include only performance measurements that were actually observed during testing.
