

Sample Project Documentation

FitBuddy – AI Fitness Plan Generator using Gemini Models

Project Title

FitBuddy – AI Fitness Plan Generator using Gemini Models

Abstract

FitBuddy is a web-based application using generative AI to create personalized 7-day workout plans and nutrition/recovery guidance from user fitness information. It supports feedback-based plan refinement and persistent storage.

Objectives

- Generate goal-oriented workout plans.
- Provide nutrition/recovery guidance.
- Allow plan refinement through feedback.
- Store user and plan information.
- Demonstrate AI, web and database integration.

Technology

Python, FastAPI, Uvicorn, Google Gemini models, HTML, CSS, Jinja2, SQLite and SQLAlchemy.

Conclusion

FitBuddy demonstrates an integrated AI, web and database workflow for personalized fitness planning.
