

Scalability & Future Plan

FitBuddy – AI Fitness Plan Generator using Gemini Models

Current Scope

The current project is designed for local execution with FastAPI, Gemini APIs, SQLite and Jinja2.

Future Possibilities

- Cloud deployment.
- Authentication and role-based access.
- Larger-scale database support.
- Progress tracking and analytics.
- Additional personalization inputs.
- Additional AI-supported wellness features.

Note

These are future possibilities and are not claims that these features already exist in the current version.
